

FLEXSOM

Experience in roofing membranes

Rely on it.

MINSTER Roofing and Roofline

Your exclusive FLEXSOM distributor

Minster Roofing and Roofline is a specialist distributor offering customers a truly comprehensive range of products, readily available through a growing network of branches.

Strong supply chain relationships and extensive knowledge of the industry means that Minster can offer their customers the latest product innovations and building solutions. Minster provides

roofing materials that are quick to construct, safe to use and that help to comply with current Building Regulations.

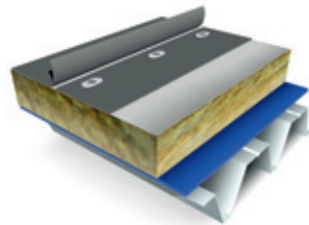

They guarantee stock availability for the most commonly purchased products, all ready for immediate dispatch.

This partnership enables Minster to exclusively bring to the market an excellent product that offers all of the high quality assurances of **RENOLIT**.

FLEXSOM Systems

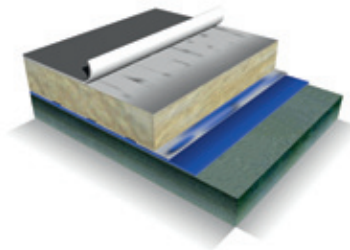

FLEXSOM A - Mechanically fastened system

Washer tubes and fasteners to approved specification are installed along the edge of the roof sheet through the insulation into the deck. This system can be used for new build and refurbishment.

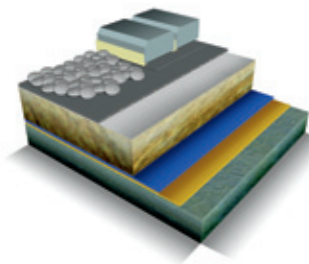

FLEXSOM S - Adhered system

The membrane is fully bonded. It is particularly suited to the roof refurbishment. This membrane can be bonded directly onto old bitumen or felt.

FLEXSOM G - Ballasted system

The membrane is covered with protection, separation and drainage layers as necessary and restrained with ballast, paving slabs or green and garden roof systems.

Delivery Programme	Thickness	Width	Roll length	Colour	Weight/roll	Rolls/pallet
FLEXSOM A	1,5 mm	1,05 m	20 m	Light Grey	42 kg	11
FLEXSOM A	1,5 mm	1,05 m	20 m	Charcoal	42 kg	11
FLEXSOM S	1,2 mm	2,10 m	15 m	Light Grey	58 kg	8
FLEXSOM S	1,2 mm	2,10 m	15 m	Charcoal	58 kg	8
FLEXSOM G	1,5 mm	2,05 m	15 m	Light Grey	59 kg	11

FLEXSOM Colours

FLEXSOM is available in light grey and charcoal. Other colours may be available depending on quantity and lead time for project.

Light grey
71004

Charcoal
79851

FLEXSOM Benefits

The FLEXSOM range consists of thermoplastic PVC-P roofing membranes. These have been used throughout the world for over 40 years in the synthetic waterproofing of roofs, for both new construction and renovation projects. Clients worldwide have placed their confidence in FLEXSOM products for waterproofing in building and construction.

Cost savings

- Savings in installation costs: a single 30m² roll could replace 2 x 3 bituminous rolls in a two layer-system, i.e. conventional roof.
- Ease of use: the membrane is quick and easy to install, at almost any time of the year.
- Structural savings: FLEXSOM is less than one-fifth the weight of conventional, multi-layer solutions.
- Savings in maintenance: maintenance is generally limited to visual inspection.

Properties in relation to fire

- When tested in accordance with BS 476-3:1958/2004, up to a EXT.S.AB rating. For the system description see BBA Agrément Certificate 13/5407.
- When classified in accordance with BS EN 13501-5:2005 designated B_{ROOF}(T4). For the system description see BBA Agrément Certificate 13/5407.
- Installation without naked flame.
- Self-extinguishing.

Aesthetics

- The roof has a smooth appearance owing to welded seams.
- Flexible and pliable: the membrane adapts to all roof geometries.
- Lends itself to architectural design.

Durability

- Life expectancy of over 35 years, assessed by the BBA (British Board of Agreement, BBA approval 13/5407).

Physical properties

- Very good static and dynamic perforation resistance.
- High vapour permeability and flexibility.

Technical support

We have a team of highly motivated staff, who are committed to providing you with the best technical and commercial support at all times and as quickly as possible. Our team is on hand to support you with advice and practical assistance in the completion of your project.

For further information and closer support with your project, please contact your nearest branch.
